📍 Vilnius, Lithuania

ABOUT ME

Third-year university student with practical experience in data analysis, Python, and SQL, gained through analytical projects, teaching, and freelance work. Experienced in working with structured datasets, writing SQL queries, and building dashboards for reporting and insights. Motivated to start a career in data analytics in an entry-level or internship role.

SKILLS

- **Programming & Data:** Python, SQL, BigQuery
- **Data Analysis:** Data cleaning, exploratory data analysis, aggregations, joins
- **Data Visualization:** Tableau, dashboards, reporting
- **Tools:** Advanced Excel, Microsoft Office
- **Web Technologies:** HTML, CSS, JavaScript

EDUCATION

Vilnius Gediminas Technical University | 2024-2027

Multimedia Design

Relevant focus areas include data visualization, digital tools, and analytical thinking applied to media and projects.

Mykolo Romerio Universitetas | 2022-2024

Game Development and Digital Animation

Developed problem-solving skills, logical thinking, and technical foundations relevant to data and technology-focused roles.

WORK EXPERIENCE

Python Instructor GOITeens | October 2024 - June 2025

- Delivered structured Python instruction focused on data handling, logic, and problem-solving
- Explained programming concepts related to variables, control structures, and basic data processing
- Reviewed and corrected code to improve accuracy, structure, and efficiency
- Assisted learners in debugging and understanding errors in Python program

PROJECTS

End-to-End User Data Analysis – Google BigQuery

Designed and populated relational tables with structured datasets
Wrote SQL queries using JOIN, GROUP BY, and aggregation functions

Netflix Content Analysis Dashboard – Tableau

Analyzed Netflix content datasets using Tableau
Built dashboards to visualize content by type, country, and release year
Presented insights through clear and structured visualizations
